

I am writing to provide feedback on the proposal to use LPFM over FM translators. I feel strongly the FCC should keep FM translators in place and not implement LPFM.

1. KLOVE serves me as a resident of the local community.

2. The effect on the local community if KLOVE were to be displaced by an LPFM broadcaster providing other programming would be extremely negative for those looking for an alternative to secular music and talk radio. This is a positive influence on many people's lives including families who need a positive and encouraging place to tune the radio for young ears.

3. The service provided by KLOVE is in the public interest because they have a pool of listeners interested in a certain kind of programming that would not be available otherwise. This is a listener supported radio -- not taking commercial funding! We strongly support this type of station and listen to it for several hours each day.

Please don't do away with our family friendly programming.
